SOURCE:

1. In August 1953, it was announced by the plant radio of the Gustav Kliment Pipe Rolling Mills, at Chomutov, that the medical and dental stations (Osetrovna) would be separated. The plant library was moved into the building which had housed these stations up to that time.
2. The medical dispensary was divided into two parts.
 - a. One part was moved into the former rooms of the construction department (technical designing), at Gate No. 1, where Dr. Hanek (fnu) had his consultation room. The dental station was also transferred there. A member of the plant militia (female) was in charge of the order in which patients were taken. She was usually standing at the entrance to the station. Access to this station was possible only from the plant or from the street, through Gate No. 1. Normal procedure for examinations or treatments was followed.
 - b. The second part of the medical dispensary was moved to the building of the Nova Tazirna (new stretching department).
3. According to the morning announcement of the plant radio, each of the two stations was for patients from only one part of the plant.
4. At the same time the medical stations were transferred, the Zabrana Urazu (prevention of accidents) department was moved from the building of Gate No. 2 to building No. 5, where it was probably accommodated in the rooms of the former plant library.
